**Subject:** RE: Follow up to Friday's meeting

Hello Erik,  
Here is the manager and a supervisor of the Division of Materials and Waste Management.  
Russ Brown (manager)  
[russ.brown@epa.ohio.gov](mailto:russ.brown@epa.ohio.gov)

George Strobel (supervisor)  
[george.strobel@epa.ohio.gov](mailto:george.strobel@epa.ohio.gov)

Thanks,  
Leslie

Do you have a contact for someone whom I could start with?

Thanks.

D. Erik Hardin

Holman Plating is a site with the Division of Materials and Waste Management, and to get information on the site you would have to do an information request.

This is great. Thanks.

You haven't happened to have learned anything about Hohman Plating have you?

Hello Erik,  
Here is a quick summary of sites near Behr that OHIO EPA has data on:

**Simclar**-Currently is being reviewed by the state attorney general's office. Ohio EPA tried to bring them up on order, and they did not agree. The property is under new ownership. I sent you the last data set that was requested and already preapproved by legal.

**EPS**-Greg Brown from our Ground Water division sent you data from Sept 2013. ESP is under order through RCRA Corrective Action. Greg receives quarterly reports from EPS if you need newer data. There are two well OW-18 and OW-19 that are close to I-75 that don't get sampled in there quarterly reports, and he suggested that these wells might assist with delineating extent.

**Aramark**-Has never been under orders, but has done some remediation on their own. They sent us a report in 2003. They applied AS/SVE.

**DAP**-Was under state orders, but those have been terminated. There is sampling of wells at the back part of the property twice a year by OHIO EPA. Last sampling event was in March of 2014. It appears that they are at or below MCLs. They applied AS/SVE.

**Gayston**-Was under state orders, and usually has sent monthly and quarterly reports. They applied AS/SVE.

**Gem City Chemical**-Was under state orders. They applied air stripping and have a NPDES permit. They last report we received from them was in July 2014.

**Gem City Engineering**- Has applied to the VAP program, and received a USD. But they never proceeded with anything, the most recent data available is from 2008. I put in the file request for and once legal approves of releasing the data, you should receive it.

To the northeast of Behr is Van Dyne Crotty and the BP terminals, but they might be too far away to be of concern, but let me know if you want information on these as well. Let me know what sites you would information on. Our record requests have to go through two steps to become released, once through the record manager and then through legal. This is what is producing a slow response time.

We had talked shortly about a map with all the houses under mitigation, and I was unsure of what was going to happen with that.

Let me know what I can do to assist.

Thank you,  
Leslie Williams
